iQ·link®

Solo System Requirements

Operating System

iQ·link Solo is available to run on 64bit versions of Windows with the following minimum requirements:

RAM
1GB available RAM is required for running iQ·link, after the operating system is fully booted

Disk Space
2.5GB available disk space is required on the destination drive for standard deployment (must be a local disk drive, <u>not</u> a network share)

Please note: Additional GIS data may require significant additional disk space, depending on the area size and resolution.

Relational Database

Oracle XE, included with the installation package

3rd Party Software

PDF reader
PDF printer (recommended for saving reports to PDF)
