

2.5 GHz Auction Planner

The complete, interactive answer on spectrum use coast to coast

Spectrum Atlas provides interactive analytics on spectrum holdings, allowing you to visualize what matters most to you.

Interactive Maps & Charts

Our interactive maps and charts allow you to instantly see available spectrum in the 2.5 GHz band. We have mapped each auction block with the existing Educational Broadband Service (EBS) licenses to determine available population and geographic area.

Simple solutions for complex data challenges

Identify Strategic Spectrum Analytics

- Unencumbered spectrum in each auction block
- Incumbent EBS licensee name, FCC call sign, lessee name and channel
- Percent of county population covered by existing EBS licenses

The Auction Planner

Spectrum ownership and leasing is complex and dynamic in the 2.5 GHz band. Getting a complete snapshot of the spectrumscape can be critical to your auction bidding strategy.
